

## **Administrative Procedure 111      ENERGY CONSERVATION**

---

The conservation of resources and appropriate stewardship are important values and life skills for students to acquire. The Board encourages staff and students to practice resource conservation in the planning and implementation of the school's programs and activities.

### **Procedures**

1. The Principal and staff are responsible for initiating actions and programs that enhance energy savings.
2. The Principal shall work with staff and students to model the importance of resource conservation and resource stewardship.
3. The Principal shall work with other Divisional personnel to develop measures that will reduce the use of energy in a cost effective manner into facility plans for new buildings and renovations.
